Use of Copyrighted Material

If you are using text, figures, tables, or any material from other books, papers, journals, websites, etc., you must obtain written permission from the copyright holder to include them in your presentation. It can take months to secure permission from other publishers to use previously published material, so start as soon as you know you are going to use these items in your presentation. Your presentation material will not be printed into a handout until all permissions have been secured. Some publishers require authors to use their forms or to submit a form electronically on their website.

Copyright and Trademark Defined

A copyright protects works of authorship, such as writings, music, and works of art that have been tangibly expressed. Examples of products that hold an SAE copyright include Standards, Papers, and Books. Material that has been copyrighted is identified with ©.

A trademark is a word, phrase, symbol, and/or design that identifies and distinguishes the source of the goods of one party from those of others. A service mark is a word, phrase, symbol, and/or design that identifies and distinguishes the source of a service rather than goods. The term “trademark” is often used to refer to both trademarks and service marks. Material that has been trademarked is identified with ™.

As the owner of your presentation material, you have the option of obtaining copyright approval for your presentation material. For information on copyrights, please contact the U.S. Copyright Office (a division of the Library of Congress). The Trademark Operation of the United States Patent and Trademark Office (USPTO) handles trademark.

Tips for obtaining permissions:

- You may need to follow up with some publishers until you obtain permission.
- Fill in the permission form completely, whether you are using SAE's form or that of another copyright holder.
- Be specific about what figures for which you are seeking permission (name of book, year of publication, edition, author, figure number, page number, caption, etc.). Including a photocopy of the material you want to use can be helpful.
- Include your name and contact information on the form so they know who to contact.
- Direct the form to "Copyright Permissions Department" if you do not have a contact name.
- Enclose a self-addressed stamped envelope with your permission request.
- Just because material can be found on the Internet does not mean it is automatically in the public domain. You need to be sure you have permission to use images and materials in your book that you find on the Internet.

An extensive amount of material and figures is available in the public domain, free of charge, and does not require permission to use. Talk to your product manager for suggestions about where to find materials in the public domain.
Guidelines for Obtaining Permission to Use SAE Copyrighted Material

Photocopying or republishing SAE copyrighted material in another work, in whole or part, without written permission is strictly prohibited. This restriction also includes presentation materials for your seminar. Remember, you own your presentation materials and copyright approval for using SAE published documents must still be obtained.

Permission and fees to photocopy or republish SAE publications (in any format) may be obtained by mailing, emailing, or faxing a written request to:

SAE Copyright Administrator
SAE International
400 Commonwealth Drive
Warrendale, PA 15096-0001 - USA
email: copyright@sae.org
fax: 724-776-9765

Please note that all requests for permission must be in writing. SAE does not grant verbal permission unless a written request has been received. When requesting permission it is recommended you use SAE's Copyright Permission form.

- For permission to photocopy SAE material, see #1 below.
- For permission to use SAE material (in whole or part) in your presentation materials, see #2 below.
- For forms, please see #3 below.

1. Request to Photocopy SAE Material
The following information must be provided with your written request to photocopy material from an SAE publication:

- Title and SAE publication number
- Edition number (if applicable)
- Copyright year
- Exact material, including page or figure numbers, for which permission is requested
- Number of copies you intend to make
- Purpose of reproduction; for classroom use include the school, professor, course, and semester
- To whom the material will be distributed, and the cost (if applicable)
- Territory in which the copies will be distributed

2. Requests to Use SAE Material (in whole or part) in Another Work
The following information must be provided in your written request to use material from an SAE publication for republication in another work, including your seminar presentation material:

- Title and SAE publication number, Edition number, and Copyright year
- Exact material, including page or figure numbers, for which permission is being requested (if not using the entire SAE publication - please estimate the percentage of the SAE publication you will be using in your new work)
- Author(s) and title of the new work in which the SAE material will appear
- Publisher and publication date of the new work in which the SAE material will appear
• Intended audience for the new work
• Approximate page count and approximate list price of the new work
• Format/media of the new work (ie, print, electronic, etc.)
• Circulation/print run of the new work
• If including this material in a seminar/presentation, include the number of attendees (if ongoing - include estimate for the year). Also include the cost to attend this seminar.
• Territory and languages in which the new work will be distributed

3. Forms to Request for Permission to Reprint Material

• You may print the pdf version of the form, or download the Microsoft Word version to attach to an electronic request.
